

PUBLIC HEALTH, MPH

Public Health Administration Concentration

Global and Community Health

chhs.gmu.edu/gch

The master of public health (MPH) is the most widely recognized professional degree for those working in the field of public health. George Mason University's MPH program requires coursework in all core disciplines of public health—epidemiology, biostatistics, health administration and management, the social and behavioral sciences, and environmental health—as well as additional coursework within the chosen concentration area and the completion of a practicum or research project. MPH concentrations include community health, epidemiology, global health, and public health administration.

The **public health administration concentration** provides courses that explain the organization, financing, and delivery of health services and public health systems in the United States. The curriculum prepares students to apply the principles of program planning, development, budgeting, management, and evaluation to organizational and community initiatives.

Admission Requirements

Admission to the program is competitive, and a variety of criteria is evaluated in the admissions process: the strength of the undergraduate record and any post-baccalaureate course work, the GRE general examination, professional goals and experience, letters of recommendation, and evidence of the ability to write and conduct research at the graduate level. Some background in statistics, biology, and the social sciences is preferred. Applications to the degree program are made through CHHS.

Application Deadline

Application deadlines for the MPH program are March 1 for the fall semester and November 1 for spring. Late applications will be considered on a space-available basis. Application materials are available at <http://admissions.gmu.edu/grad>.

The Department of Global and Community Health hosts information sessions on a regular basis for those interested in our academic programs. Visit the college website for details.

Program of Study

Students must complete 42 credits of graduate course work. Each course can be used to fulfill only one requirement. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a 3.00 GPA to graduate.

Public Health Core Courses (all concentrations)	15
