CHHS Funding Opportunity Announcements

Gerber Foundation

Pediatric Research Projects

Deadline: Research Concept paper due by December 1, 2013

The primary focus of the Foundation's grant making is on health and nutritional issues affecting infants and young children. Research projects aimed at finding solutions to children's health and nutritional problems are sought. Of particular interest are those offering a substantial promise of meaningful advances in prevention and treatment of diseases and those with broad applicability to the general population. Proposed projects may address etiologic mechanisms; new, improved, or less invasive diagnostic procedures; reduction/elimination of side effects; nutrient supplementation; and preventive measures. In 2012, the Foundation gave total of $290,000 for this program.

Grant (William T.) Foundation

William T. Grant Distinguished Fellows Program

Deadlines: LOIs has 3 deadlines in 2014: January 8, May 6 and August 16

This program is designed to increase the supply of, demand for, and use of high-quality research in the service of improved youth outcomes. Provides influential mid-career researchers the opportunity to immerse themselves in practice or policy settings and conversely gives influential practitioners and policymakers the opportunity to work in research settings. The sponsor currently support research to understand and improve the everyday settings of youth ages 8 to 25 in the United States. Specifically, they fund studies that enhance understanding of: how youth settings work, how they affect youth development, and how they can be improved; and, when, how, and under what conditions research evidence is used in policy and practice that affect youth, and how its use can be improved. 1-4 fellows are selected annually, each receiving up to $175,000 (including direct and indirect costs) for fellowship of 6-24 months.

Grant (William T.) Foundation

Social Settings Grants

Deadlines: LOIs has 3 deadlines in 2014: January 8, May 6 and August 16
The Foundation supports high-quality research that enhances our understanding of how youth settings work, how they affect youth development, and how they can be improved. Projects must address issues that have compelling relevance for theory, policy, and/or practice affecting the settings of youth ages 8 to 25 in the US. Typically $100-600,000 for 2/3 yrs. Projects involving secondary data analysis are at the lower end of the budget range, whereas projects involving new data collection and sample recruitment can be at the higher end.

British Council and US Institute for International Education

Global Innovation Initiative

Deadline: December 16, 2013

The Global Innovation Initiative is a higher education partnership grant opportunity aimed at strengthening multilateral research collaborations between universities in the UK, US and selected countries including Brazil, China, India, and Indonesia. Grants will be awarded to interdisciplinary higher education partnerships focusing on globally significant issues related to STEM. Priorities for this round of funding: Energy, environment and climate change; Agriculture, food security and water; Global health and wellbeing; Urbanization. Two parallel competitions have opened in the UK and US. $150-250,000.

CDC: National Institute for Occupational Safety & Health

NIOSH Small Research Grant Program (R03)

Deadlines: NIOSH uses standard NIH deadlines for R03 proposals

NIOSH provides support for projects designed to develop an understanding of the risks and conditions that are associated with occupational diseases and injuries, to explore methods for reducing risks and for preventing or minimizing exposure to hazardous conditions in the workplace, and to translate significant scientific findings into prevention practices and products that will effectively reduce work-related illnesses and injuries. The purpose of this grant program is to develop an understanding of the risks and conditions associated with occupational diseases and injuries, to explore methods for reducing risks and for preventing or minimizing exposure to hazardous conditions in the workplace, and to translate significant scientific findings into prevention practices and products that will effectively reduce work-related illnesses and injuries. $50,000/yr/2yrs.

CDC: National Institute for Occupational Safety & Health

NIOSH Exploratory and/or Developmental Grant Program (R21)

Deadlines: February 16, June 16, and October 16 annually.

NIOSH invites applications to develop an understanding of the risks and conditions associated with occupational diseases and injuries, to explore methods for reducing risks and for preventing or minimizing exposure to hazardous conditions in the workplace, and to translate significant scientific findings into prevention practices and products that will effectively reduce work-related illnesses and injuries. $275,000/2yrs

CDC: National Institute for Occupational Safety & Health

Mentored Research Scientist Development Award (K01)

Deadlines: February 12, 2014; June 12, 2014, October 12, 2014

Sponsor invites grant applications for research career development related to occupational safety and health. The goal of the NIOSH research program is to support research that is relevant and of high quality, and that will have an impact in reducing occupational disease and injury. This program is intended to contribute to this goal by facilitating the preparation of the next generation of occupational safety and health researchers and educators. Emphasis for funding is placed on projects that specifically address the priority goals of the NIOSH National Occupational Research Agenda (NORA) which is described at http://www.cdc.gov/niosh/programs/. This industrial sector-based agenda has been developed to focus resources on priority problems that significantly impact the illness and injury burden on US workers. Research training supported by this announcement may include a wide range of training modalities reflecting the diverse approaches needed to effectively address occupational safety and health problems effectively. $100,000.yr/3yrs.

NIH: National Institute on Alcohol Abuse and Alcoholism and Office of Dietary Supplements

Nutrition and Alcohol-Related Health Outcomes (R03, R21, R01)

Deadlines: Standard NIH deadlines

NIAAA and ODS invite applications that propose to examine associations between nutrition and alcohol-related health outcomes in humans and animal models. The goal of this FOA is to stimulate a broad range of research on the role of nutrition in the development, prevention, and treatment of a variety of alcohol-related health outcomes including alcohol use disorder and chronic disease.
