American Heart Association

National Scientist Development Grant

Deadline: July 18, 2013

Supports highly promising beginning scientists in their progress toward independence by encouraging and adequately funding research projects that can bridge the gap between completion of research training and readiness for successful competition as an independent investigator. Applications may be submitted for review in the final year of a postdoctoral research fellowship or in the initial years of the first faculty/staff appointment; and have no more than four years since his/her first faculty/staff appointment (after receipt of doctoral degree) at the assistant professor level. $77,000/yr for 4yrs.

American Heart Association

National Established Investigator Award

Deadline: July 18, 2013

Supports mid-career investigators with unusual promise that have an established record of accomplishments. Candidates must have a demonstrated commitment to cardiovascular or cerebrovascular science as indicated by prior publication history and scientific accomplishments. Must be a faculty member with current national-level funding as a principal investigator (or co-PI) on an R01 grant or its equivalent. At the time of award activation must be at least four years but no more than nine years (i.e., eight years and 12 months) since the first faculty/staff appointment at the assistant professor level. $80,000/yr for 5yrs

Gerber Foundation Research Grant

Deadlines: June 1, and December 1, 2013

Foundation mission focuses on the nutrition, care and development of infants and young children. Grant-making interests are focused on health and/or nutrition-related research having a significant impact on issues facing infants and young children from the first year before birth to age 3. Priority to fresh approaches to solving newborn or pediatric problems or emerging issues with a predictable time frame to clinical application. Projects should be focused on issues faced by care providers that, when implemented, will improve the health, nutrition and/or developmental outcomes for infants and young children. Competitive requests will be focused in a way to achieve measurable outcomes that could result in systemic practice changes within a reasonable period of time. Priority to projects of national or regional impact. Up to $300,000 for up to 3 years.

Patient-Centered Outcomes Research Institute (PCORI)

Addressing Disparities; Communication and Dissemination Research Program

Deadlines: June 15, 2013 and October 15, 2013

For projects that address critical decisions that face patients, their caregivers, and clinicians every day and with too little information. These decisions must be consequential, be occurring now without key evidence about the comparative effectiveness of two or more options, and patients/caregivers must benefit from new knowledge in ways that are clear and important. The premise of this research is that new knowledge will support critical choices by patients, caregivers, and their clinicians, not that it will deliver a verdict that will lead us to dictate a choice. A total of up to $12M available.

DoD: Military Medical Research and Development Dept. of the Army -- USAMRAA

Injury Prevention, Physiological and Environmental Health Awards (IPPEHA)

Deadline: May 14, 2013

Funding focused on applied research, defined as research that refines concepts and ideas into potential solutions to military health and performance problems with a view toward evaluating technical feasibility; includes studies and investigations leading to candidate solutions in preparation for initial human testing. This award mechanism will also support advanced technology development which is defined as research for the development of candidate solutions and components of early prototype systems for test and evaluation. Promising drug and vaccine candidates and medical devices and technologies are selected for initial safety and efficacy testing in small scale human clinical trials. Applications may include phase I or early phase II clinical trials, but not late phase II large-scale effectiveness clinical trials or advanced development of products and capabilities. Preliminary data are required for applied research and advanced technology development applications. $6M for up to 5 awards.

US Department of Justice- Office of Juvenile Justice and Delinquency Prevention

Internet Crimes against Children Task Force National Training Program

Deadline: May 28, 2013

OJJDP seeks to identify training providers to serve the Internet Crimes against Children task force program. The state and regional ICAC task forces work collaboratively as a national network of law enforcement and prosecutorial agencies that prevent, interdict, and investigate technology-facilitated child sexual exploitation and Internet crimes against children. This program furthers the Department’s mission to provide training and support in this area of constantly evolving technology. Grantees will provide training to ICAC task forces and affiliated federal, state, and local law enforcement and prosecutorial agencies in the areas of investigation, forensics, prosecution, community outreach, and capacity building, using recognized experts to assist in the development and delivery of content. OJJDP will provide input and guidance on training topics, publications, manuals, training conferences, and other substantive issues and deliverables.
